

## μS 19" Rack

The UPS 19" series was developed for sophisticated mobile surveillance stations to protect homeland borders. These systems are designed for easy portability, with a small footprint and light weight, and removable battery cabinets for even easier handling.

The UPS 19" was developed in two versions: 3 phase in, 1 phase out, and meets strict military standards. The device can be rack mounted.

<b>INPUT</b>	3.6kVA	6kVA
Voltage	230Vac	
<b>OUTPUT</b>		
Voltage	220V / 230V / 240V	
Power	3.6kVA / 2.5kW	6kVA / 4.2kW
<b>DIMENSIONS</b>		
Height	5U	3U
Width	19"	19"
Depth	49cm	49.6cm
Weight (without batteries)	20	22
<b>STANDARDS</b>		
EMI Suppression	According to EN55022-A	
UPS Standard	IEC 146-4	

## Outdoor Stabilizer - MOD

The MOD needed a stabilizer for outdoor semi-military operation. The stabilizer is to stabilize the power output from a generator, without a battery backup system. The design of this product needed to take into account its mobility as well as its exposure to environmental elements.

In response to these issues, Gamatronic created a UPS with a "suitcase" structure which was suitable for both outdoor use and ease of portability. When being transported, the stabilizer is closed and sealed on all sides, and its light weight and convenient carrying handles make it easy to carry. When in use, the lid of the "suitcase" is opened, providing access to the components while protecting the unit from rain and other environmental elements.

<b>CAPACITY</b>	<b>1kVA/650W</b>
<b>INPUT</b>	165/270Vac
	Frequency 50Hz±5
<b>OUTPUT</b>	230Vac±12%
	50Hz±0.25%
<b>DIMENSIONS</b>	Height 26cm
	Width 41 cm
	Depth 25 cm
	Weight 18 Kg
<b>STANDARDS</b>	General and safety: EN5009-1
	EMC: EN50091-2
	Design: ENV50091-3
